-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Part III DETAILED ACTION**

#### ***Notice to Applicant(s)***

1. This action is responsive to the following communications: amendment filed on 3/7/05.
2. This application has been reconsidered. Claims 11-29 are pending.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 11, 12, 13, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Hashimoto et al (Hashimoto) (U.S. 5,907,319).

With respect to claims 11, 20, 21, 22, 23, 26, 27, 28, and 29 Hashimoto discloses an image processing apparatus (figure 2) comprising an input unit, adapted to input image data (column 4, lines 20-40); a processor, adapted to perform a job based on the image data input by said input unit (column 7, lines 40-52); an operation unit (figure 8), adapted to display an

Art Unit: 2626

operation screen for the job to be performed by the processor and accept a user operation based on the operation screen (column 10, lines 10-64), an entering unit, adapted to enter a user ID (the Abstract, lines 7-11 and column 12, lines 20-42); and a controller, adapted to change parameters to be displayed on the operation screen of said operation unit based on the user ID entered by said entering unit the parameters being for processing the image data inputted by said input unit and being selectable by a user corresponding to the user ID entered by said entering unit (the abstract and column 12, lines 26-60), and changing a language based on the user ID (the abstract).

Further with respect to claim 23, Hashimoto discloses entering the ID using a card (column 8, lines 53-66).

Further with regard to claim 27, Hashimoto discloses controlling what language is displayed on the screen (column 8, lines 45-63).

With respect to claim 12, Hashimoto discloses the image data is obtained by reading an image of a document (column 4, lines 25-61 and figure 17).

With regard to claim 13, Hashimoto discloses the operation screen is controlled based on the ID of the user (figures 17 and 26 and column 12, lines 61-65).

With respect to claim 16, Hashimoto discloses controlling what language is displayed on the screen (column 8, lines 45-63).

With regard to claim 17, Hashimoto discloses controlling the number of user selectable items to be displayed (the abstract and column 9, lines 10-21).

With respect to claim 18, Hashimoto discloses controlling the number of screens displayed (simple and standard) (the abstract).

Art Unit: 2626

With regard to claim 19, Hashimoto discloses displaying a common screen without user ID (column 10, lines 10-56).

With respect to claims 24 and 25, Hashimoto discloses that after a predetermined time elapses the control unit clears the screen (column 13, lines 14-19).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashimoto in view of Arakawa (U.S. 6,532,077).

With respect to claims 14 and 15, Hashimoto differs from claims 14 and 15 in that he does not clearly disclose sending the print job to a particular destination based on the user ID. Arakawa discloses an image processing system which transmits the image data to a particular destination (column 10, lines 35-46). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Hashimoto wherein the image data is sent to a specified destination. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Hashimoto by the teaching of Arakawa in order to improve the efficiency of the system as disclosed by Arakawa in column 1, lines 66-67.

***Response to Arguments***

5. Applicant's arguments with respect to claims 11-21 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
